PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications with Laravel, Symfony, React and Next.js. Currently working on the Karaca e-commerce platform, where I re-planned and restructured payment flows. Proficient in designing RESTful APIs, optimizing frontend performance and implementing CI/CD pipelines. Experienced in Agile teams, leading feature development and mentoring junior developers.

PROFESSIONAL EXPERIENCE

Senior Software Developer | Moneo | Remote | May 2021 – Present

Outsourced software solutions company

Karaca (Current Project) – E-commerce Platform

- Re-planned and restructured the payment flows of the Karaca e-commerce platform, analyzing existing checkout and payment processes and redesigning them for reliability and maintainability.
- Contribute to both frontend and backend development, improving architecture, implementing new features and optimizing performance.
- Take part in CRM, CMS and SEO-related processes, handling both technical development and project coordination.
- Informally act as team lead by managing communication and decision-making on critical issues.

Previous Projects – Kitapyurdu, ConectoHub

- Designed and maintained scalable REST APIs with Laravel and Symfony, serving 100k+ daily users.
- Improved SEO score by 40% through lazy loading, code splitting and server-side rendering.

Junior Software Developer | Piple | Remote | Jul 2020 – Jan 2021

- Developed a real-time chat application for a website project using Laravel and Vue.js.
- Built the messaging infrastructure from scratch, integrating frontend and backend.
- Focused on performance, security and usability enhancements.

Junior Software Developer | Maxithings | Remote | Jul 2019 – Dec 2019

- Contributed to backend development of a mobile app with live streaming features using Symfony and API integration.
- Developed mobile UI and live stream modules using Ionic.
- Integrated WebRTC-based OpenVidu technology for live streaming.

SKILLS

Languages: PHP, JavaScript, TypeScript

Frameworks: Laravel, Symfony, OpenCart, Express.js, React.js, Next.js, Vue.js

Tools & DevOps: Git, Docker, Linux, CI/CD, Redis, Webpack

Testing: PHPUnit, Jest, TDD

Methodologies: Agile, Scrum, Domain-Driven Design (DDD), SOLID Principles

PROJECTS

Prodtest – No-code API Testing Tool: No-code end-to-end API testing tool built with Laravel, with detailed documentation and an intro video on GitHub. Won second place in a hackathon organized by Teknasyon.

Contra: Combines contribution graphs from GitHub and GitLab into a single unified display.

Craze – Developer Tools: Open-source desktop app that brings together useful tools for developers.

Guvercin: REST API client developed with Electron.js.

EDUCATION

B.Sc. Software Engineering | Karadeniz Technical University | Trabzon, Türkiye | 2016 – 2022

- Led the university Software Club; organized events, workshops and community activities, strengthening leadership, teamwork and public communication skills.
